

WITTMANN & PARTNER – Romanian software development company, well-experienced in R&D projects

WHO WE ARE:

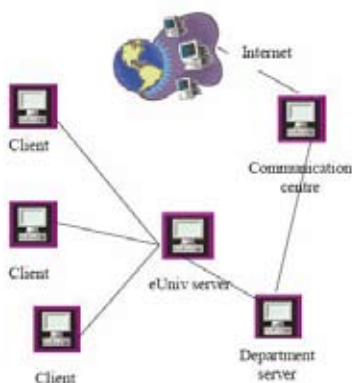

The company Wittmann & Partner Computer Systems (WPCS) is located in Sibiu (Transylvania region), in the centre of Romania. Its main business is to develop **innovative software solutions**, which translate the results of the applied research projects into real life. WPCS aims at bringing a sustainable high added value to its customers via its **extended expertise** gathered within an international level and also through its working standards using **PRINCE2 methodology**.

COLLABORATION INTERESTS:

- WPCS is interested in participating in both research and commercial projects developed within the EU or wider framework.
- WPCS' possible role:
- Software Developer
- Provider of R&D related services
- Provider of know-how and expertise in its activity areas

**WHAT
MAKES US
A GOOD
PARTNER**

- Well-developed technical skills
- High experience in international R&D projects co-financed by the EU
- Outstanding experience in projects developed according to PRINCE2 methodology
- Close cooperation with academic institutions

AREAS FOR R&D COLLABORATION:

- Intelligent manufacturing systems: production planning and optimization
- Information retrieval: multi-agent systems, data mining, artificial intelligence
- Experience DataBase: ontology, case-based reasoning
- Decision support systems: group decision support systems
- Knowledge and competence management
- Corporate logistics
- Web development

MAIN ACHIEVEMENTS:

- Development of innovative solutions based on the experience gathered within R&D projects
- Involvement in different networks promoting research excellence.

REFERENCE PROJECTS:

WPCS has participated as a partner in 4 EU-funded projects, and in 3 projects co-funded within a national framework. Additionally, the company has participated in several R&D projects developed on a commercial basis, the overall aim being to implement innovative solutions to industrial partners and public sector.

Selection of EC projects:

KoBaS (FP6), 2004 –2007: Knowledge Based Customized Services for Traditional Manufacturing Sectors Provided by a Network of High Tech SMEs. The role of WPCS refers to the development and integration of Experience Database component into KoBaS solution, and setting-up of Competence Centres for exploitation purposes within the Network of HighTech SME-s. www.kobasproject.com

DiFac (FP6), 2006 – 2009: Digital Factory for Human-Oriented Production System. The aim is to develop an innovative Collaborative Manufacturing Environment (CME) for next generation of digital manufacturing. The main tasks of WPCS are to develop and integrate the Collaboration Manager component into DiFac solution, as well as to lead the demonstration-related work package. www.difac.net

TraSer (FP6), 2006 –2009: Identity Based Tracking and Web Services for SMEs.

The aim of the project is to develop ICT for Networked Businesses. The role of WPCS is TraSer application exploitation and evaluation. www.traser-project.eu

MPA (FP5), 2001 –2004: Modular Plant Architecture. Category: Competitive and sustainable growth programme (GROWTH). The role of WPCS was the integration of the semi-automatic emulation model generator into the prototype system. www.mpa-online.net

Selection of other projects:

e-Edu-Quality (CEEX), 2006 – 2009: Quality Management System for Higher Education Based on Knowledge and Learning Informatic Tools.

E Collaborative Decision (CEEX), 2005 – 2008: Group decision support system in public administration and academic environment – premises for decentralisation and democratisation of the decision-making system. The role of WPCS is the development and implementing of GDSS solution.
