Introduction

The background of the slide features a composite image. In the foreground, a person is seen from behind, leaning over the side of a sailboat on a choppy blue sea. In the background, a glowing blue and white globe of the Earth is visible, suggesting a global or international context. The overall color palette is dominated by various shades of blue.

- ❖ Every day, organizations require information drawn from an important number of documents of various types spread across networks, intranets and Internet sites around the world. Too often, however, this information is not easily accessible.

Searching for information

- ✗ users have no idea where to start their search,
 - ✓ where to find what they really want,
 - ✓ what services are available for doing their job,
 - ✗ users are not aware of every change in the Intranet/Internet,
 - ✓ services, documents appear and disappear over time
- ➔ users loose to much time by manually searching!!!

Goals, actions and benefits

The background of the slide features a composite image. In the upper portion, a person is seen from behind, leaning over the side of a sailboat on a choppy blue sea. Below this, a large, semi-transparent globe of the Earth is visible, showing cloud patterns and continents. The overall color scheme is a gradient of blues, from a deep blue at the bottom to a lighter blue at the top.

- ✓ assist the user in the diagnosis process and query reformulation
- ✓ select appropriate information source for an efficient searching
- ✓ translate the query accordingly to the available search engines
- ✓ manage searching strategy
- ✓ support the user in the results assessment
- ✓ provide the user with the appropriate outputs in a suitable form

What can SEA do for your organization?

- ❖ Locates critical information quickly and easily
- ❖ Searches for documents of all popular file types
- ❖ Retrieves information from a wide variety of information sources
- ❖ Produce ranked results based on each user profile
- ❖ Keep up to date a personal user profile

What can SEA do for your organization?

The background of the slide features a blue-toned image of a person in a small, traditional boat navigating through a rough, turbulent sea. The person is leaning forward, actively managing the boat's movement. The water is dark and choppy, with white foam from the waves. The overall scene conveys a sense of struggle and the search for stability or direction, which metaphorically relates to the challenges of finding and organizing information in a complex digital environment.

- ❖ Deliver the right information to the right people with superior accuracy.
- ❖ Increase employees' productivity as they spend less time searching and more time working.
- ❖ Give employees access to valuable hard-to-find information.
- ❖ Organize searches in a unified interface to access information of any type, anywhere.

What can SEA do for your organization?

A person in a small boat is navigating a large wave on a blue sea. The person is wearing a dark shirt and shorts, and is leaning forward, holding onto the boat's structure. The wave is large and white, with a blue sea in the background. The overall scene is dynamic and suggests a challenge or a journey.

- ❖ Prevent information duplication when employees re-create information they cannot find.
- ❖ Increase ROI of intelligence and information operations by making their data more accessible.

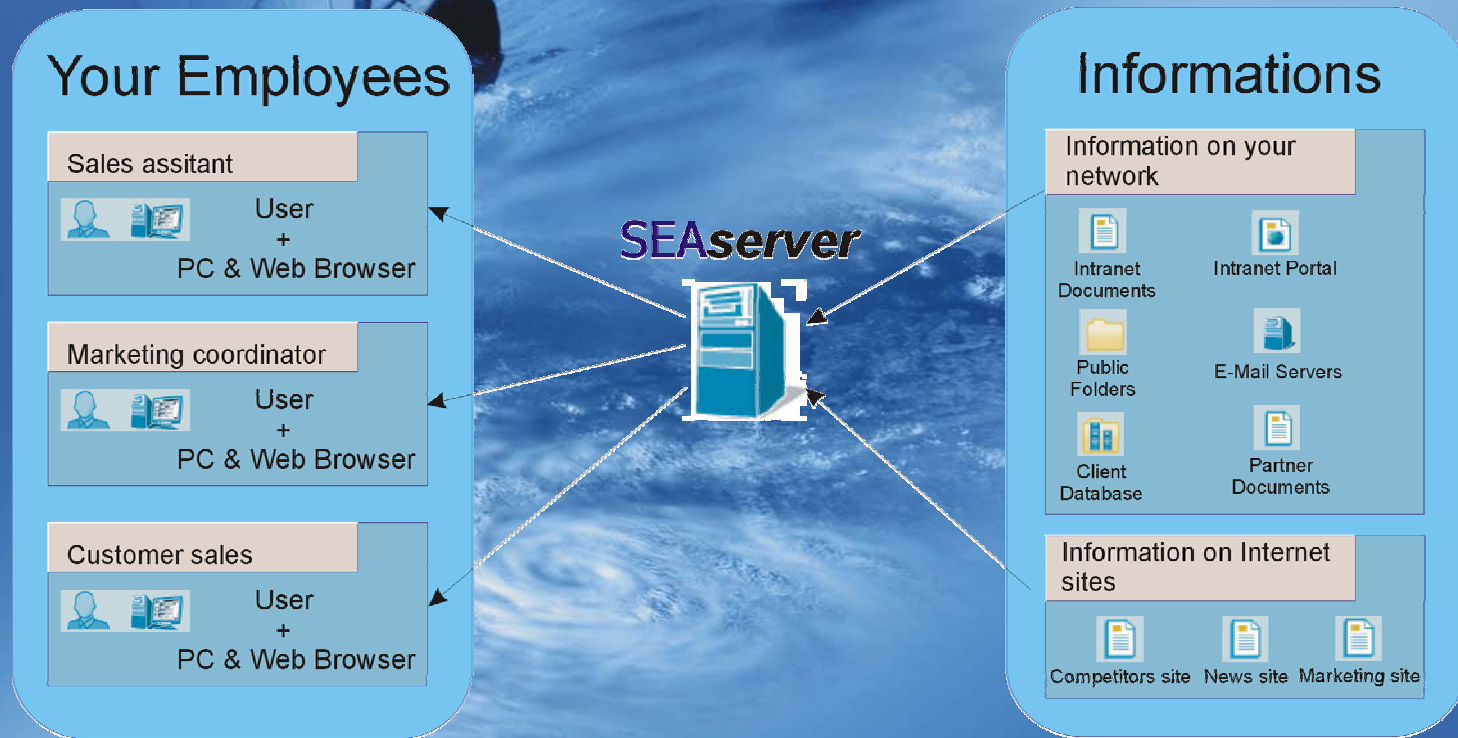

SEA Client

- ❖ Designed to be used on one system
- ❖ Allow multi user accounts
- ❖ All feature are included in this version
- ❖ Easy to use, user friendly interface
- ❖ Allow you to search over organization Intranet
- ❖ Allow you to search over the Internet
- ❖ Use full power of multi agents systems

SEA Enterprise

Conceptual overview of SEA Enterprise

- ❖ Designed to be used inside of your enterprise
- ❖ Web enabled user interface
- ❖ Full indexed function for all common files

Multi Agent Architecture

- ❖ Using a multi agent approach and latest AI algorithms SEA provide you best search experience
- ❖ Easy to administrate
- ❖ Easy to integrate on current Intranet portals
